

## NEWS RELEASE

### **Mcllvenna Bay Becomes the World's First Carbon Neutral Copper Development Project Following Completion of Carbon Offset Purchases**

**Vancouver, BC (May 18, 2021)** Foran Mining Corporation (TSX.V: FOM, OTCQX: FMCXF) ("Foran" or the "Company") is delighted to announce that its 100% owned Mcllvenna Bay project ("Mcllvenna Bay" or "the Project") is now the world's first carbon neutral copper development project following the completion of carbon offset purchases to offset emissions from exploration activities undertaken at the Deposit over the past 10 years. A copy of the Company's [GHG Inventory Report](#) can be found on our website.

The total emissions for exploration over 10 years (2011-2020), including land use changes, fuel use for exploration and travel-related emissions, was 5,744.98 tonnes of CO<sub>2</sub>e and the emissions measurement was conducted in alignment with the ISO 14064-1 standard and GHG Protocol Corporate Standard.

The transaction will provide revenue for two offset projects: the Kariba Forest Protection project in Zimbabwe (verified to VCS/VERRA standard and a REDD+ project) and the NL Climate & Ecosystems Conservancy Project (verified under ISO-14064-2):

- [Kariba Forest Protection project in Zimbabwe](#)
- [NL Climate & Ecosystems Conservancy Project](#)

The offset projects were specifically chosen because they are verified to a high standard and incorporate Canadian and international projects.

**Dan Myerson, Executive Chair of Foran, commented:** *"Mining is critical to the advancement of the global economy and our collective ambitions of decarbonisation; it is for this reason that we need to ensure that we are doing everything we can to produce the essential materials we need for a low carbon future (such as copper and zinc in our case) in the most responsible way possible."*

*"Our actions taken to date - in offsetting the carbon emitted in the exploration phase, to ensure that the entire impact of the project from day one of development, through to operations, to eventual closure is carbon neutral – evidence our commitment to zero harm, not only because it is the right thing to do for the environment and people alike but also because there is a wealth of research that clearly demonstrates that sustainable, responsible businesses have greater corporate longevity and create superior returns for shareholders, stakeholders and society in the long term."*

**Pierre Lassonde said:** *"This is important because this might be a world first, it is certainly a first for mining, a first for copper and a first for me. I am delighted to see Dan and his team reach this important milestone. They are really taking mining in a new direction, leading by example, and showing what is possible for the future of the industry."*

## About Foran Mining

Foran Mining is a copper-zinc-gold-silver exploration and development company, and we are committed to supporting a greener future, empowering communities, and creating circular economies which create value for all our stakeholders, while also safeguarding the environment.

Our goal is to build the first mine in Canada designed to be carbon neutral from day one of production. We are in the feasibility stage of development for our flagship McIlvenna Bay project in eastern Saskatchewan.

McIlvenna Bay is a copper-zinc-gold-silver rich VMS deposit intended to be the centre of a new mining camp in a prolific district that has already been producing for 100 years. McIlvenna Bay sits just 65km from Flin Flon, Manitoba and is part of the world class Flin Flon Greenstone Belt that extends from Snow Lake, Manitoba, through Flin Flon to Foran's ground in eastern Saskatchewan, a distance of over 225km.

McIlvenna Bay is the largest undeveloped VMS deposit in the region. The Company filed a NI 43-101 Technical Report for the PFS on the McIlvenna Bay Deposit on SEDAR on April 28, 2020. Foran's copper-zinc VMS Bigstone Deposit is expected to serve as additional feed for the mill at McIlvenna Bay. The Company filed a NI 43-101 Technical Report for the Bigstone Deposit's first resource estimate on January 21, 2021.

Foran trades on the TSX.V under the symbol "FOM" and on the OTCQX under the symbol "FMCXF".

## Forward Looking Statements

### CAUTIONARY NOTE REGARDING FORWARD LOOKING STATEMENTS

This news release contains "forward-looking information" (also referred to as "forward looking statements"), which relate to future events or future performance and reflect management's current expectations and assumptions. Often, but not always, forward-looking statements can be identified by the use of words such as "plans", "hopes", "expects", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates", or "believes" or variations (including negative variations) of such words and phrases, or state that certain actions, events or results "may", "could", "would", "might" or "will" be taken, occur or be achieved. Such forward-looking statements reflect management's current beliefs and are based on assumptions made by and information currently available to the Company. All statements, other than statements of historical fact, are forward-looking statements or information. Forward-looking statements or information in this news release relate to, among other things: complete the feasibility study in a timely manner, and the anticipated capital and operating costs, sustaining costs, net present value, internal rate of return, payback period, process capacity, average annual metal production, average process recoveries, anticipated mining and processing methods, proposed PFS production schedule and metal production profile, anticipated construction period, anticipated mine life, expected recoveries and grades, anticipated production rates, infrastructure, social and environmental impact studies, future financial or operating performance of the Company, subsidiaries and its projects, estimation of mineral resources, exploration results, opportunities for exploration, development and expansion of the McIlvenna Bay Project, its potential mineralization, achieve carbon neutral status from day one of production, the future price of metals, the realization of mineral reserve estimates,

costs and timing of future exploration, the timing of the development of new deposits, requirements for additional capital, foreign exchange risk, government regulation of mining and exploration operations, environmental risks, reclamation expenses, title disputes or claims, insurance coverage and regulatory matters. In addition, these statements involve assumptions made with regard to the Company's ability to develop the McIlvenna Bay Project and to achieve the results outlined in the PFS, and the ability to raise capital to fund construction and development of the McIlvenna Bay Project.

These forward-looking statements and information reflect the Company's current views with respect to future events and are necessarily based upon a number of assumptions that, while considered reasonable by the Company, are inherently subject to significant operational, business, economic and regulatory uncertainties and contingencies. These assumptions include: our mineral reserve and resource estimates and the assumptions upon which they are based, including geotechnical and metallurgical characteristics of rock confirming to sampled results and metallurgical performance; tonnage of ore to be mined and processed; ore grades and recoveries; assumptions and discount rates being appropriately applied to the technical studies; success of the Company's projects, including the McIlvenna Bay Project; prices for zinc, copper, gold and silver remaining as estimated; currency exchange rates remaining as estimated; availability of funds for the Company's projects; capital decommissioning and reclamation estimates; mineral reserve and resource estimates and the assumptions upon which they are based; prices for energy inputs, labour, materials, supplies and services (including transportation); no labour-related disruptions; no unplanned delays or interruptions in scheduled construction and production; all necessary permits, licenses and regulatory approvals are received in a timely manner; and the ability to comply with environmental, health and safety laws. The foregoing list of assumptions is not exhaustive.

The Company cautions the reader that forward-looking statements and information include known and unknown risks, uncertainties and other factors that may cause actual results and developments to differ materially from those expressed or implied by such forward-looking statements or information contained in this news release and the Company has made assumptions and estimates based on or related to many of these factors. Such factors include, without limitation: the projected and actual effects of the COVID-19 coronavirus on the factors relevant to the business of the Corporation, including the effect on supply chains, labour market, currency and commodity prices and global and Canadian capital markets, fluctuations in zinc, copper, gold and silver prices; fluctuations in prices for energy inputs, labour, materials, supplies and services (including transportation); fluctuations in currency markets (such as the Canadian dollar versus the U.S. dollar); operational risks and hazards inherent with the business of mining (including environmental accidents and hazards, industrial accidents, equipment breakdown, unusual or unexpected geological or structure formations, cave-ins, flooding and severe weather); inadequate insurance, or the inability to obtain insurance, to cover these risks and hazards; our ability to obtain all necessary permits, licenses and regulatory approvals in a timely manner; changes in laws, regulations and government practices in Canada, including environmental, export and import laws and regulations; legal restrictions relating to mining; risks relating to expropriation; increased competition in the mining industry for equipment and qualified personnel; the availability of additional capital; title matters and the additional risks identified in our filings with Canadian securities regulators on SEDAR in Canada (available at [www.sedar.com](http://www.sedar.com)). Although the Company has attempted to identify important factors that could cause actual results to differ materially, there may be other factors that cause results not to be as anticipated, estimated, described or intended. Investors are cautioned against undue reliance on forward-looking statements or information.

These forward-looking statements are made as of the date hereof and, except as required by applicable securities regulations, the Company does not intend, and does not assume any obligation, to update the forward-looking information.
