

Foran Mining Corporation (FOM-TSX.V), a Vancouver based exploration and mining company, is seeking an experienced **Permitting and Environmental Coordinator** for its McIlvenna Bay Project in east-central Saskatchewan. The McIlvenna Bay Cu-Zn-Au-Ag deposit is one of the largest undeveloped VMS deposits in Canada. Foran completed a pre-feasibility study for the deposit in 2020 and is undertaking a significant drill program to support Feasibility level work on the deposit this year.

Foran is committed to building a skilled and diverse workforce as we move into our next phase of growth.

Permitting and Environmental Coordinator – Posting 2021-012

Reporting to the Vice President, Operations, and working a 5-days on/2-days off schedule, this person is responsible for obtaining and maintaining the applicable regulatory authorizations for compliant start up of the McIlvenna Bay Project. You will work with local stakeholders and community members to lead the development of all operational environmental monitoring policies and procedures. You will be an active participant on the site Emergency Response team and be an active Mine Rescue Volunteer.

Job Responsibilities:

- Work with the Community Liaison in providing regular environmental updates to local stakeholders and communities
- Work with the Permitting Lead in ensuring diligent, timely receipt of key operating licenses
- Assist with developing detailed application packages for the project
- Develop environmental monitoring policies and procedures
- Manage and report on permitting schedules and budgets
- Work closely with the accounting team to ensure any land/water usage fees are kept in good standing
- Coordinate and assist various consultants visiting the site to conduct base line and monitoring programs to support compliance or permitting activities
- Ensure time and temperature sensitive lab samples are delivered following mandated Chain of Custody protocols
- Assist in the preparation of environmental field reports/memos, compliance reports, management plans and online reporting functions as they pertain to regulatory and permit requirements
- Establish database for all field data and report on daily, weekly, monthly trends and variances
- Participates in meetings and field inspections with the company, contractors, consultants, and regulatory agency personnel, as required
- Support site operations by planning and delivering environmental training for employees, contractors and service providers

Job Requirements:

- Bachelor of Science, Engineering or Environmental Technology Diploma
- 3 - 5 years of related technical experience
- Thorough knowledge of regulations, environmental compliance, and permitting process within Saskatchewan
- Demonstrated experience operating various types of all-season, all terrain vehicles and field instrumentation (ATV, Snow machine, boat/motor, flow/water quality meter, GPS, laptops, data loggers)
- Good management and communication skills with the ability to effectively work with on-site personnel
- Mine rescue volunteer would be an asset
- Valid drivers license
- Experience MS Office

This posting is for a full-time position to commence immediately. A competitive compensation package is available for the successful candidate.

Foran is creating a blueprint for responsible mining that causes the least possible harm and delivers better returns from day one of operation. We aim to be cleaner, safer, fairer, and more efficient than the competition by design. We are committed to protecting the earth and communities with zero-emission technologies, environmentally friendly practices, combined with innovative worker safety and quality of life initiatives and strong transparent governance.
