

Foran Mining Corporation (FOM-TSX.V), a Vancouver based exploration and mining company, is seeking an experienced, motivated, and enthusiastic **SENIOR GEOSCIENTIST** for its McIlvenna Bay Project in east-central Saskatchewan. The McIlvenna Bay Cu-Zn-Au-Ag deposit is one of the largest undeveloped VMS deposits in Canada. Foran is currently advancing a Feasibility Study and is undertaking a significant expansionary and exploratory drill program.

Foran is committed to building a skilled and diverse workforce as we move into our next phase of growth.

SENIOR GEOSCIENTIST

This position is responsible for onsite management and execution of exploration drill programs, data collection, QA/QC and coordinating core shack activities and staff on a rotational basis. The successful candidate will also provide collaborative input into the design and implementation of the geological, geochemical and geophysical components of current and future programs.

Duties & Responsibilities

- Core logging including geological, geotechnical, geophysical, and geochemical data
- Management of exploration/core logging teams in the field
- Supervision of drill rigs
- Formulation and execution of exploration programs
- Interpretation of geological data, development and building 2d/3d geological models
- Provide training and supervision of junior geology staff and technicians on the collection of all aspects of geological and geotechnical data in the field
- QAQC of Geoscience data
- Input of required Geoscience data into the Foran databases in a timely and error free format. Checking and maintenance of those databases on a regular basis
- Foster positive working relationships with co-workers and contractor both on and off site
- Always demonstrate safe behaviour and comply with the site's standards and procedures in SHEC.
- Promote awareness of SHEC practices and imbed a safety culture.

Skills & Competencies

- Analytical and planning skills
- An ability to strongly promote teamwork and collaboration,
- Ability to challenge others and provide input into the ongoing programs in the form of ideas, views, and expertise. Open minded approach to geology, not model driven

- Ability to communicate both upwards and downwards in the management structure
- Working knowledge of a variety of ore deposits and mineralization styles including; VHMS, IOCG, and shear zone hosted Au
- Advanced exploration procedures and techniques including; core logging (geology, Geotech, pXRF), structural geology, geochemistry, geophysics and drilling
- Ability to utilize GIS and 3d modelling software.
- Understanding of database requirements and QAQC

Experience, Qualifications & Education

- Bachelor's degree qualified Geologist
- Must be member of an approved Geoscience organisation
- Minimum 8 years in exploration/mining Geoscience
- Proven experience in exploration and in resource drilling

This posting is for a full-time permanent position to commence immediately, based in Saskatoon, Saskatchewan. A competitive compensation package is available for the successful candidate.

Foran is creating a blueprint for responsible mining that causes the least possible harm and delivers better returns from day one of operation. We aim to be cleaner, safer, and more efficient than the competition by design. We are committed to protecting the earth and communities with zero-emission technologies, environmentally friendly practices, combined with innovative worker safety and quality of life initiatives and strong transparent governance.
