**1. NATURE AND CONTINUANCE OF OPERATIONS**

Foran Mining Corporation (the "**Company**") is a publicly listed company on the TSX Venture Exchange, incorporated under the laws of British Columbia. The Company and its subsidiary are involved in activities that include the acquisition and exploration of mineral properties.

The Company's head office and registered and records office is located at 904 - 409 Granville Street, Vancouver, British Columbia, V6C 1T2.

The Company has incurred significant operating losses in its exploration operations and its ability to continue as a going concern is dependent upon the discovery of economically recoverable mineral reserves, the ability of the Company to obtain necessary financing to complete their development and fund their operations until commercially successful and future production or proceeds from the disposition thereof. While the Company has been successful in securing financing to date, there can be no assurances that it will be able to do so in the future.

These condensed consolidated interim financial statements do not reflect the adjustments to the carrying values of assets and liabilities, the reported expenses and the consolidated statement of financial position classifications that would be necessary if the going concern assumption was inappropriate. These adjustments could be material.

**2. BASIS OF PREPARATION**

These condensed consolidated interim financial statements have been prepared in accordance with International Accounting Standard 34 – *Interim Financial Reporting* ("**IAS 34**") as issued by the International Accounting Standards Board ("**IASB**") using accounting principles consistent with International Financial Reporting Standards ("**IFRS**") as issued by the IASB.

These condensed consolidated interim financial statements should be read in conjunction with the Company's audited consolidated financial statements for the fifteen month period ended December 31, 2013 which include the accounting policies used in the preparation of these condensed consolidated interim financial statements.

These condensed consolidated interim financial statements were prepared on a historical cost basis using the accrual basis of accounting, except for cash flow information.

The Board of Directors approved these condensed consolidated interim financial statements on August 17, 2015.

**3. INVESTMENTS**

As at June 30, 2015, the Company owned shares of two mineral exploration companies listed publicly on the Canadian Securities Exchange that were classified as available-for-sale ("**AFS**") and carried at fair market value based on quoted market prices. **5. EXPLORATION AND EVALUATION ASSETS (continued)**

**a) McIlvenna Bay, Saskatchewan**

The Company owns a 100% interest in the McIlvenna Bay mineral property located in Saskatchewan ("**McIlvenna Bay**").

Certain claims that make up the McIlvenna Bay property are subject to a Net Tonnage Royalty of \$0.75 per tonne of ore extracted, with a right of first refusal in favour of the Company.

Cameco Corporation and BHP Billiton Limited collectively hold a 1% net smelter return ("**NSR**") royalty interest in McIlvenna Bay, which can be purchased at any time for \$1,000,000.

**b) Other Saskatchewan Properties**

The Company holds interests ranging from 65% to 100% in five mining claim groups in its Saskatchewan property portfolio, exclusive of McIlvenna Bay.

The Company has committed, through previous mineral property ownership agreements associated with these Saskatchewan properties, to pay various NSR and net profits interest ("**NPI**") royalties. The NSR royalties range from 2% to 2.5%, with buyout provisions for up to one-half of some of these NSR royalties, and the NPI royalties range from 6% to 10%.

On January 29, 2014, the Company purchased various NPI royalties from Thundermin Resources Inc. ("**Thundermin**") on certain of the Company's Saskatchewan properties and Manitoba properties in consideration for a cash payment of \$50,000 and 100,000 common shares of the Company with a fair value of \$18,000.

In October 2014, the Company completed an agreement (the "**Back-in Agreement**") with Teck Resources Limited ("**Teck**") to extinguish back-in rights held by Teck on certain of the Company's Saskatchewan properties. In consideration for the extinguishment of the back-in rights, the Company issued 1,000,000 common shares of the Company with a fair value of \$240,000 and 1,000,000 share purchase warrants with a fair value of \$82,581 to Teck, the amounts of which were capitalized to exploration and evaluation assets. Each warrant is exercisable into one common share of the Company at a price of \$0.24 per share with an expiry of October 14, 2016.

In the event the Company sells or options any of the properties included in the Back-in Agreement prior to September 30, 2018 (a "**Future Sale**"), the Company will pay Teck in-kind an amount equal to 20% of the proceeds from any Future Sale occurring prior to September 30, 2016 and 10% of the proceeds from any Future Sale occurring after September 30, 2016 but prior to September 30, 2018.

**c) Manitoba Properties**

The Company holds a 100% interest in one Manitoba property consisting of one claim.

**6. DEFERRED SHARE UNITS**

The Company has adopted a deferred share unit plan ("**DSU Plan**") which awards deferred share units to participants of the DSU Plan. Awards are initially charged to operations using the market value of the Company's common shares that best represents the period for which the awards were earned, with the corresponding liability recorded as deferred share units. At each period end, the liability is revalued using the market value of the Company's common shares, with the corresponding increase or decrease recorded to operations as a revaluation of deferred share units.

**e) Share purchase warrants**

Changes in the subjective input assumptions can materially affect the fair value estimate.

**9. FINANCIAL INSTRUMENTS**

The Company examines the various financial instruments to which it is exposed and assesses the impact and likelihood of those risks. These risks include credit risk, liquidity risk and market risk (including interest rate, currency and other price risk). The risk related to financial instruments is managed by senior management of the Company under policies and directions approved by the Board. Relevant policies include the Treasury Management Policy and the approval allowing a portion of the Company's cash to be held in US dollars at the discretion of the Chief Executive Officer and the Chief Financial Officer. The Board monitors these policies on a quarterly basis. The Company's Board has not approved the use of derivative financial products.

**a) Fair value of financial instruments**

The fair value hierarchy established by IFRS 7 *Financial Instruments: Disclosures* has three levels to classify the inputs to valuation techniques used to measure fair value described as follows:

- Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 – Inputs other than quoted prices that are observable for the assets or liabilities either directly or indirectly; and
- Level 3 – Inputs that are not based on observable market data.

The fair values of the Company's accounts receivable and accounts payable and accrued liabilities are equivalent to their carrying values due to their short-term nature. AFS financial instruments are comprised of marketable securities, which are valued using Level 1 measurements.

**b) Credit risk**

Credit risk is the risk of an unexpected loss if a party to a financial instrument fails to meet its contractual obligations.

The credit risk associated with cash and cash equivalents and investments is minimized as these financial instruments are held with major Canadian commercial banks. In respect of accounts receivable, the Company is not exposed to significant credit risk as the majority consists of amounts due from Canadian governmental agencies.

**c) Liquidity risk**

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company has in place a planning and budgeting process to determine the funds required to support the Company's operating requirements as well as its planned capital expenditures. The Company manages its financial resources to ensure there is sufficient working capital to fund near term planned exploration work and operating expenditures. The Company has considerable discretion to reduce or increase plans or budgets depending on current or projected liquidity. When appropriate, the Company will seek joint venture partners in order to fund or share the funding of its exploration properties to minimize shareholder risk. As at March 31, 2015, the Company had sufficient cash to meet its obligations related to accounts payable and accrued liabilities and required administrative and property expenditures over the next twelve months.

**9. FINANCIAL INSTRUMENTS** (continued)

**d) Market risk**

**(i) Interest rate risk**

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market interest rates. The Company is exposed to short-term interest rates through the interest earned on cash and cash equivalents. A 1% change in short-term rates would not have a material impact on net loss.

**(ii) Foreign currency risk**

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in foreign exchange rates. The Company holds substantially all of its cash resources in Canadian dollars with an insignificant amount held in US dollars, making currency risk minimal.

**(iii) Other price risk**

Other price risk is the risk that the fair value or future cash flows of a financing instrument will fluctuate due to changes in market prices, other than those arising from interest rate risk or foreign currency risk. The Company is exposed to other price risk in terms of its investment. A 30% change in price would not have a material impact on other comprehensive loss.

**10. CAPITAL MANAGEMENT**

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern, so that it can provide returns for shareholders and benefits for other stakeholders. The Company's strategy remains unchanged from the year ended December 31, 2014.

The Company considers the items included in equity as capital. The Company manages the capital structure and makes adjustments to it in response to changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Company may issue new shares, or acquire or dispose of assets.

In order to facilitate the management of its capital requirements, the Company prepares annual expenditure budgets that are updated as necessary. The annual budgets are approved by the Board.

In order to maximize ongoing exploration efforts, the Company does not pay dividends. The Company's treasury management policy is to invest its cash in highly rated liquid short-term interest bearing investments with an initial term to maturity of twelve months or less.

The Company is not subject to externally imposed capital requirements.
