Foran Mining Corporation (FOM-TSX.V), a modern mining company that wants to change what mining means to people, is seeking an enthusiastic **Environment Technician Trainee** to join their expanding environmental team at the McIlvenna Bay site.

The McIlvenna Bay Cu-Zn-Au-Ag deposit is one of the largest undeveloped VHMS deposits in Canada. Foran recently completed (2022) a feasibility Study for the deposit and is undertaking advanced exploration activities this year. The McIlvenna Bay deposit's core commodities are critical for the global transition to green energy and Foran aims to extract these critical minerals in a sustainable manner by empowering local communities, contributing to circular economies and protecting the environment for future generations.

Foran is committed to building a skilled and diverse workforce as we move into our next phase of growth. Preference will be given to qualified candidates for this position who are residents of the communities of Amisk Lake/ Denare Beach, Deschambault Lake, Pelican Narrows, or Creighton/Flin Flon.

Environment Technician Trainee — Posting 2022-015

The environment technician trainee will play a key role in environmental monitoring and inspection of the McIlvenna Bay Project. The trainee will work a 2 week in, 2 week out rotational schedule at the McIlvenna Bay site in northeastern Saskatchewan, approximately 80 km from Creighton, Saskatchewan. The on-site team is small, diverse, and passionate and this role requires someone who can think on their feet, maintain flexibility to adapt to changing conditions and work collaboratively with internal and external stakeholders.

Job responsibilities:

- Complete environmental inspections to assess site condition
- Gather air, water, and soil samples to assess environmental conditions
- Perform field tests on air, water, and soil samples and document results
- Participate in and lead field investigations and inspections
- Follow instructions for environmental monitoring and inspection
- Issue and follow up on instructions for corrections necessary to comply with federal and provincial regulations
- Initiate environmental monitoring and compliance activities
- Implement quality control and quality assurance protocols for testing materials for conformity and compliance
- Measure field characteristics, properties, and composition of biological systems

Job requirements:

- High school diploma. A certificate or diploma in environment, water resources, or other related discipline would be considered an asset
- Valid driver's license
- Demonstrated experience operating various types of all-season, all-terrain vehicles and (ATV/UTV, Snow machine, boat/motor)
- Good communication skills with the ability to effectively work with on-site personnel
- Capable of working alone
- Able to review, understand and ensure permit requirements are followed
