

Foran Mining Corporation (FOM-TSX.V), a modern mining company that wants to change what mining means to people, is seeking an experienced, motivated, and enthusiastic **Coordinator, Environment and Permitting** to join their expanding McIlvenna Bay project team. This is a full-time position supporting the McIlvenna Bay site, located within the Hanson Like District of Eastern Saskatchewan. This position will work a 2 week in/ 2 week out rotation.

The McIlvenna Bay Cu-Zn-Au-Ag deposit is one of the largest undeveloped VHMS deposits in Canada. Foran recently completed a feasibility study (2022) for the deposit and is undertaking advanced exploration and detailed Engineering activities this year. The McIlvenna Bay deposit's core commodities are critical for the global transition to green energy and Foran aims to extract these critical minerals in a sustainable manner by empowering local communities, contributing to circular economies and protecting the environment for future generations.

Foran is committed to building a skilled and diverse workforce as we move into our next phase of growth. Residents of Saskatchewan's North, members of the Peter Ballantyne Cree Nation, members of the Cumberland House Cree Nation, and Métis peoples are encouraged to self-declare when submitting applications and resumes.

Coordinator, Environment and Permitting – Posting 2023-030

Foran Mining has recently completed a positive feasibility study for the McIlvenna Bay project and is advancing design and permitting. A **Coordinator** is required to provide oversight and support for all project work including advanced exploration activities, project permitting and operational readiness. This role will be vital in the development, execution, and implementation of environmental policy, monitoring, reporting and permitting practices for McIlvenna Bay. The role will report to the Manager, Environment & Permitting.

Job Responsibilities:

- Ensure site compliance with relevant legislation, operation approvals, environmental management practices through guidance, coaching, mentoring and oversight.
- Support site operations by planning and delivering environmental training for employees, contractors and service providers.
- Plan, development and implement the environmental management plan and associated procedures and work instructions.
- Assist in the design of sampling/ monitoring programs for industrial facilities and prepare recommendations and action plans.
- Produce high quality technical environmental reports/memos, compliance reports, and online reports as they pertain to regulatory and permit requirements.
- Develop and maintain environmental monitoring data records for the site;
- Assist with developing detailed permitting application packages.
- Assist with development of environmental monitoring and permitting schedules and budgets;
- Participate in meetings and field inspections with the company, contractors, consultants, and regulatory agency personnel, as required.
- Coordinate and assist various consultants or contractors to support compliance or permitting activities.

F O R A N

Job Qualifications and Skills:

- Understanding of provincial and federal environmental legislation, regulations, standards and guidelines applicable to the mining industry in Saskatchewan.
- Bachelor's degree in related field of science or engineering or diploma in environment with suitable combination of experience.
- 3 to 7 years experience in an industrial setting.
- Excellent verbal/written communication, organizational and time management skills, attention to detail and the ability to operate with a high degree of accuracy.
- Experience with Microsoft Office (Excel, Word, PowerPoint, Teams, Outlook).
- Professional designation – P.Eng, P.Geol, P.Ag or equivalent or eligible to be designated a Qualified Person with respect to the Saskatchewan Environment Code is considered an asset.

Physical Demands:

- Ability to work in remote locations, in various weather conditions.
- Ability to lift and carry heavy equipment and materials (up to 50 pounds).
- This position works a rotational schedule 14 days on and 14 days off at our McIlvenna Bay project site which is only accessible by vehicle. Commute options are via shuttle with pick-up and drop off in Saskatoon or Prince Albert or by vehicle from other destinations.

Tools & Equipment:

- Will be required to operate UTV, ATV, snowmobile and boat.
- May be required to operate a chainsaw or firearm.

Deadline for applications to be submitted is: September 19, 2023

A competitive compensation package is available for the successful candidate. Interested applicants can email their CV and cover letter to careers@foranmining.com
